

# LYRAS

*“Bringing Pasteurization into the 21<sup>st</sup> century”*

Lyras is a Danish company located in Aalborg and founded in 2017. Lyras is developing a revolutionary new way to pasteurize liquid foods with the use of UV-light technology instead of heat. The system can replace the more than 150-year old method of heat pasteurization and simultaneously reduce the energy consumption by more than 90%.

Additionally, more vitamins and proteins are retained in the product and shelf life becomes vastly longer. This also enables us to help reduce the sector's collected carbon footprint.

## Internships

We are looking for interns who can handle assignments in one or more of the following areas: Digital marketing and communications, SEO, CSR strategy, PR and social media content creation, video production (company, product and sales videos), market analysis, etc.

We expect that our interns are committed, punctual and meticulous, which should be reflected in the tasks you perform during your internship.

### **What we can offer:**

Lyras has a flat organizational structure, where we prioritize the opportunity for learning and believe in freedom of responsibility. Your tasks are what you make them into being, and the difficulty depends on your ambition level. You will become a part of a dynamic and committed team, where sparring opportunities with team members are available. Additionally, we organize monthly team social events during your internship.

The official language in the company is English, however, the daily internal dialog can be conducted in both Danish and English.

**Deadline: 31-05-2019**

Do you want to apply your theoretical knowledge on real world problems? Are you a strong candidate within your field of studies?

If you are looking to be part of a team that has developed a ground-breaking technology with the potential to contribute to saving the planet, then you are the one we are looking for!

## Project Collaborations

Lyras is looking for students to collaborate with on mapping out our future path within biology, research development, the sciences, HR, communications and marketing.

We are looking for inputs to optimize our profile, therefore, you have the opportunity to make an actual impact on our business. We are flexible in regard to the specifics of your topic and in giving interviews and feedback.

Present us the topic you wish to investigate in our business, and we will see if it is a match.

We expect that you sign a non-disclosure agreement, as we will provide you with confidential data concerning our company and product qualifications. We also expect to receive a presentation of the final findings and a report in Danish or English.

**If you are interested in internships or project collaborations, visit our website's career page for more details:**

**[www.lyras.dk/careers/](http://www.lyras.dk/careers/)**

For internship applications, upload your CV and a personalized cover letter indicating the date your internship period starts.

For project collaborations, indicate the topic you wish to investigate in our business and the project timeframe. We are open to giving interviews and feedback.
